```java
Public class Sum of Three Numbers {
Public static void main (String[] args)
{
int num1 = 3, num2 = 9, num3 = 10, result;
result = num1 + num2 + num3 ;
System.out.println ("The result after addition is" + result);
}
}
```

```java
import java.util.Scanner;

public class SumOfThreeNumbers{
    public static void main(String[] args){
        int num1=3,num2=9,num3=10,result;
        result=num1+num2+num3;
        System.out.println("The result after addition is "+result);
    }
}
```

$javac SumOfThreeNumbers.java

$java -Xms128M -Xmx16M SumOfThreeNumbers

The result after addition is 22
